

ADEL VETERINARY CLINIC

MEDICINE • ACUPUNCTURE • BOARDING

Dr. Elizabeth Holland - Dr. Lisa Kilgore - Dr. Nicole Powers - Dr. Amanda Steffen

Canine Spay:

We recommend spaying pet's for three major reasons:

1. No unwanted pregnancies
2. Reduces your pet's risk of breast cancer
3. Eliminates the possibility of a life threatening uterine infection called a Pyometra

*If you are concerned about your pet going under anesthesia **please** chat with our team, it's what we are here for. We understand your concerns, & want to do what's best for both you & your pet.

		COMFORTS	
		<ul style="list-style-type: none"> • Calming Pheromones • Homemade Quilts • Calming Music • Post-Op warm towels 	

We have found it to work best to just do a price range over an exact cost for this type of procedure:

\$420 - \$640

*Factors that would cause the price to increase would be the size of your pet, if you request a microchip, if your pet is pregnant, in heat, or has an umbilical hernia. If for some reason we expect it to be more than this range we will reach out to you. If financial assistance is needed please know we do accept Care Credit & Scratchpay, just apply online for pre-approval. We look forward to getting your pet scheduled today!
