

ADEL VETERINARY CLINIC

MEDICINE • ACUPUNCTURE • BOARDING

Dr. Elizabeth Holland - Dr. Lisa Kilgore - Dr. Nicole Powers - Dr. Amanda Steffen

Canine Neuter:

We recommend spaying pet's for three major reasons:

1. No unwanted pregnancies
2. Reduces your pet's risk for prostate or testicular cancers
3. Helps to reduce aggression or marking behaviors

*If you are concerned about your pet going under anesthesia **please** chat with our team, it's what we are here for. We understand your concerns, & want to do what's best for both you & your pet.

		COMFORTS <ul style="list-style-type: none"> • Calming Pheromones • Homemade Quilts • Calming Music • Post-Op warm towels 	

We have found it to work best to just do a price range over an exact cost for this type of procedure:

\$648 - \$857

*Factors that would cause the price to increase would be is the size of your pet, if a scrotal tack is necessary, if you request a microchip (\$71.00), if your pet has an umbilical hernia, suffers from cryptorchidism or baby teeth. **If blood work has been completed within the last month, this price could decrease (approximately \$210-\$270).** If for some reason we expect it to be more than this range we will reach out to you. If financial assistance is needed please know we do accept Care Credit & Scratchpay, just apply online for pre-approval.

We look forward to getting your pet scheduled today!
